

MPDP INSTALLATION CASE-STUDY

CHORUS, WELLINGTON AIRPORT 3 x 12 CONFIGURATION, 16 PANELS

VideoPro provided and installed 12 Orion MPDP seamless plasma panels at Wellington Airport for Chorus. The 4 x 3 panel display is run by an Onelan MTB5005 content management solution.

The Onelan unit turns the panels on/off, schedules and runs content, tells the MPDP to display the image across 12 panels, and can be updated remotely across a network.
